

GELLY RECEIVES CERIU AWARD

Sandra Gelly, PEng., senior project engineer at GAME Trenchless Consultants, received the Prix du CERIU award Dec. 1 at INFRA Congress 2015.

Since 2012, CERIU (the Centre for Expertise and Research on Infrastructures in Urban Areas) board of directors have given the award to an institutional, corporate and municipal member in thanks to their contribution to CERIU.

Criteria for selection includes membership in CERIU, active involvement with the committees and subcommittees, technological contribution that has helped in the advancement of CERIU and its activities and historical contribution to the creation, sustainability or development of CERIU activities.

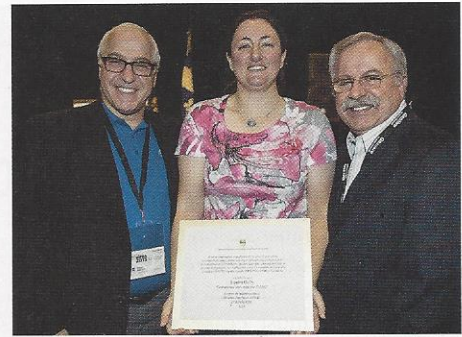

Gelly's involvement at CERIU began in 2004 after her graduation from McGill University, in Montreal, where she spent a year and a half working on projects such as sliplining and HDD sample tenders.

In addition to Gelly, who received the corporate member award, other CERIU members receiving the Prix du CERIU award at INFRA Congress 2015 were municipal member Sylvain Boudreau, City of Gatineau, Que-

bec and institutional member Florian Lafage, ACRGTQ.

CERIU is a Montreal, Quebec-based not-for-profit organisation whose mission is to act as an expertise and reference center for the sustainability of municipal infrastructures.

The annual INFRA Conference, hosted by CERIU, welcomes more than 1,500 engineers, technicians, decision makers, managers, researchers and urbanists, as well as 47 exhibits.

GRUNDODRILL 4X IDEAL FOR TIGHT QUARTERS

TT Technologies' compact Grundodrill 4X is designed for residential service, small diameter water main installations, last mile operations and gas pipeline applications. The Grundodrill 4x offers 9,800 lbs. of thrust and pullback. Using the compact drill is less intrusive and ideal for areas where

larger units are not an option. The drill features a dual hydrostatic pump system and a four-auger stake down system that provides greater stability. The Grundodrill 4X also comes with the exclusive Smart Vice system that performs vice cycling operations automatically.

CHANNELINE GRP Structural Lining Systems

ANY SHAPE - ANY SIZE

Channeline has been involved in the provision of specialist GRP structural lining elements for over 3 decades, during which time we have accumulated an unrivalled degree of experience relative to the rehabilitation of both circular and non-circular large diameter buried pipeline structures worldwide.

Channeline can be produced in any size and shape and specializes in egg, box, ovoid, elliptical and box shapes.

Features:

- Custom-Made Production in any Shape or Size Required
- Fully Structural Rehabilitation Solution
- Maximizing Hydraulic Capacity
- Excellent Corrosion Resistance
- Excellent Impact and Abrasion Resistance
- Expected Service Life of Over 50 Years
